ME ALUMNI DAY 2023

7th April 2023 | MIST Campus

TECHNOLOGY (MIST) ** * TECHNOLOGY FOR

Memories are the threads that weave us together, binding generations with shared experiences, aspirations, and achievements. This magazine is more than just a collection of photographs—it is a time capsule of the legacy built by each batch, from ME-01 to ME-22. It reflects the spirit of perseverance, innovation, and camaraderie that defines our department.

With every turn of the page, we revisit the milestones, the friendships, and the challenges that shaped us. These memories remind us that while time moves forward, the bonds we've created remain unbreakable. As we celebrate our journey, may this magazine serve as a testament to the past, an inspiration for the present, and a guiding light for the future.

Welcome to ECHOS OF ME, where the past meets the present, and the legacy continue.

ME 01 THE PIONEERS

ME 02 THE PATHFINDERS

ME 03 THE GROUNDBREAKERS

ME 04 THE TORCHBEARERS

ME 05 THE BUILDERS

ME 06 THE INNOVATORS

ME 07

THE GAME CHANGERS

Basic PLC Operation

In this example pushbuttons, connected to a PLC's inputs, are used to start and stop a motor, which is connected to the PLC's output through a motor starter. (A pushbutton can be thought of as a sensor that detects the pushing of a button.)
